

1/ Main project Description and objectives Objectives: Ever since we started the book of the project of the book of the project of the proj

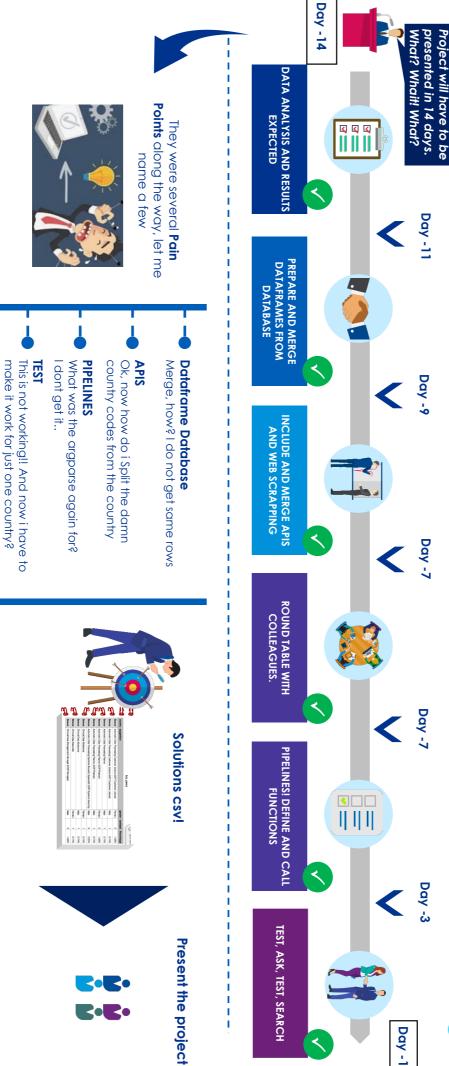

something good will come out of it... is the result of throwing all ingredients (pandas, sql, Python and its libraries and finally the most feared pipelines) into a blender and expect Objectives: Ever since we started the bootcamp and specifically module 1, we have been preparing for this moment..the project of module 1

Objectives: to piss us off!! Kidding aside, definitely this is the real thing! I believe to be able to touch and feel something done from scratch me is face a real world problem and see how powerful this is that gathers all learnings in 9 weeks and that works!! is the pay off from the hard job we have done here. So in one word the objective for

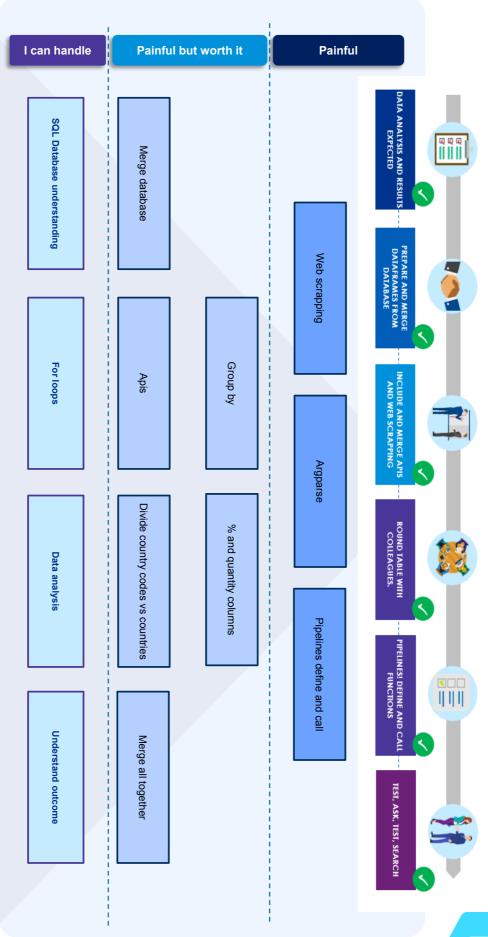

N ယ **INGREDIENTS** help even after the end of the 21:30 pm class on Monday. Active listening, classes replay... 9 weeks of classes, Monday, Wednesday, Saturday 12 hours!! Amazing teachers and TA willing to wouldn't have reach anywhere LEARNINGS – 108 hours To ride a bicycle you learn riding it...without all the practice behind the learnings and tools, we LOOOTS OF PRACTICE - "n" hours **Pandas** Bash SQL ОП **ග Python Libraries** Web Scrapping APIS 50% 20% 30% Run the script and obtain requested database

Brief description of the journey i took to achieve this Project, hard work, fun, not so fun and joy moments...

Thank you!
